

WATMOV – Your Extended Design & Drafting Partner

Let us support your design journey together

About Us

Watmov® Australia is your extended support team, enhancing output, timelines, and efficiency.

We are an engineering drafting team that helps meet your requirements at minimal cost, enabling you to deliver more and enhance your business potential.

Watmov® has a sizable drafting team in Pune, India, where we handle production work and support our clients.

Watmov Australia Values

At Watmov® our values define how we do our work and represent our skills to add engineering values to customer.

- Long term relation
- Value added engineering to achieve client goals
- Reliability and trust

What we do

We support consultant with

- Landscape – Home & Commercial
- Oval / Grounds / Road Median
- Micro Irrigation – Dripline and Sprinkler Design
- Pump Station and Hydraulic Design
- Drainage and Storm water Plans
- Drafting works
- Any work in the field of Civil and Mechanical engineering

Typical support activities:

- Preparation of Plans
- Preparation of Installation / Details Drawings
- Compiling of BoQ
- Preparation of Specification documents as per your needs

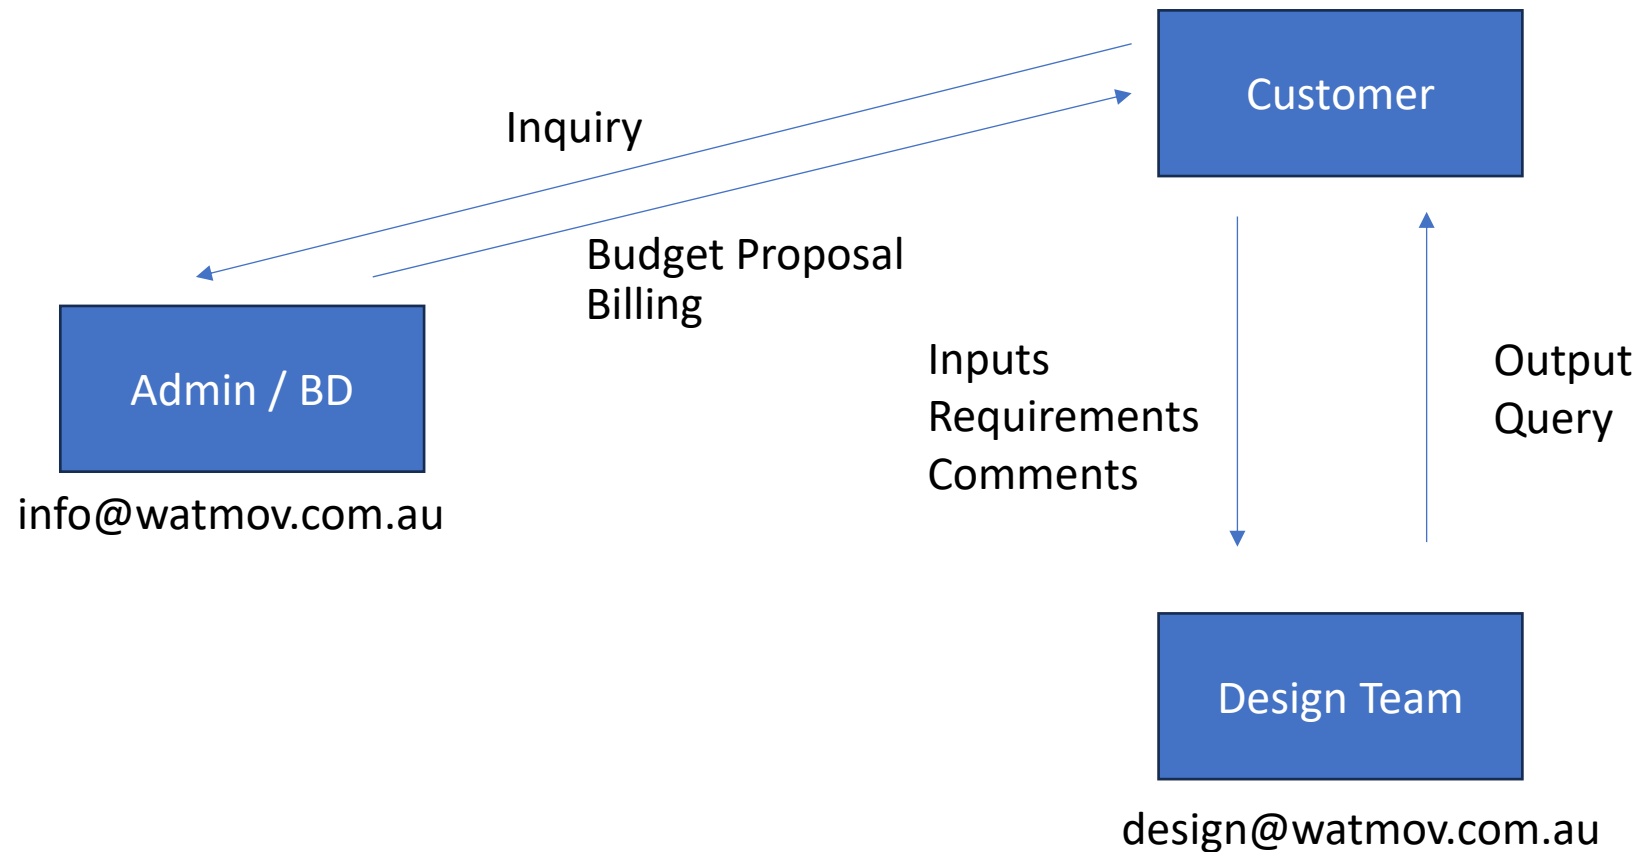

How we operate

- Typically, a new customer will send an inquiry or design requirement to us at info@watmov.com.au and design@watmov.com.au
- The design team will review the inputs, contact you for any further clarifications, discuss the details, and then provide a proposal on the project's effort level, budget, and timeline.
- Upon confirmation, the design team will deliver the work, discuss any necessary modifications, and complete the project.
- As we work on multiple projects with customers, we become familiar with the requirements and formats, which improves delivery time efficiency.

Communication

Easy communication with design team available on:

- E mails
- Phones
- WhatsApp
- Microsoft Teams
- Google Meet
- Zoom call

NOTE:

1. ALL DIMENSIONS IN mm UNO.
2. CONSTRUCTION OF THRUST BLOCKS TO BE ADEQUATE AND SHALL BE IN ACCORDANCE WITH AS/NZS 2566.
3. PVC ABOVE GROUND TO BE CLASS 12 OR GREATER AND PAINTED.
4. ALL FLANGES TO BE TABLE 'E' UNO.
5. ALL VALVE LOCATIONS ARE TO BE APPROVED ON SITE PRIOR TO FINAL PLACEMENT.
6. ALL DAMAGE/DISRUPTION TO SERVICES ARE TO BE RECTIFIED AT THE COST OF THE CONTRACTOR.
7. MINIMUM MAIN PIPE COVER TO BE 700MM.
8. ALL COMPONENTS USED ARE TO BE WASTEWATER COMPLIANT.
9. ANY COMPONENTS INSTALLED ABOVE GROUND ARE TO HAVE SUFFICIENT FROST INSULATION MEASURES APPLIED.
